Dear Honorable Govenor Carney and Mr. Garvin,

I would encourage you to listen to the people of Delaware. I do NOT support an executive branch regulation banning the sale of new gasoline or diesel-fueled automobiles. I have already voice my concern for a variety of reasons – legimate reasons. Now the research supports ending this pursuit.

If you want to push something, push hydrogen. That’s where it will eventually end. The battery is not sustainable nor practical for a variety of reasons.

Would love to discuss. Please back off this measure.

Kind regards,

Kelli Krueger
