Subject: Electric Vehicles

Our infrastructure is not ready to handle this requirement. The cost of these vehicles are also an issue. I think of my Mother who is on a fixed income and will not be able to afford the cost of a new car nor the cost of adding the electric outlet plug to her home.

I also think about the following people:

- City of Wilmington residents
- Apartment building residents
- Homes with multiple vehicles

How are all of these people going to charge their vehicles? Is there even a plan in place?

I feel we are pushing this agenda before we have the infrastructure in place to meet the demand.
