**Subject:** DNREC'S ZERO EMISSIONS STANDARDS PROPOSALS

I am taking the time out of my busy day to make sure that I express my displeasure at this proposal.

Senior citizens do not have enough money to go buying these types of cars nor do we have the money to change our electric system in our homes to accommodate charging the batteries of these EV vehicles or the astronomical cost of replacement batteries. As a matter of fact, most of the populations of the state of Delaware can afford this proposal.

When are you going to pay attention to the true needs of your constituents? Well, here is a prime opportunity to do so.

Do not support this bill. It is not what your constituents need nor want. You are supposed to represent the true entity and population of the legal citizens of the state of Delaware. The last poll clearly show that the majority of Delawarians do not, I repeat do not, support this proposal.

Please do the right thing and listen to your constituents and do the right thing by them. Enough is enough of politicians doing what they want and not doing what the people need. Too many bills are passed without thinking about the needs of our citizens, but are rather the politicians agenda. So I ask of you to please think about the agenda being representative of the true agenda of our legal citizens of this state. Do not let this proposal go through.

If you have any questions regarding my comment, please feel free to reach out to me.

Theresa Glasscock

(Legal Delaware and registered voter/resident of the United States of America.)
