**Subject:** Gas - Powered Cars in Delaware

Sirs,

Please be advised that I strongly object to the proposal to ban the sale of gas-powered cars in Delaware. If and when electric cars become more affordable and more efficient than gas-powered cars, and when sufficient charging stations are available, citizens will naturally migrate to electric cars from gas-powered cars. In other words, I support a free market where electric cars compete with gas cars and citizens are free to choose which type better meets their needs. I request you withdraw this autocratic proposal, as it is incompatible with "the pursuit of happiness" for citizens of the First State.
