Subject: Protect our health and speed electric vehicle adoption!
Date: Wednesday, March 8, 2023 8:47:45 AM

Dear Kyle Krall,

Real world study of EV adoption study shows that emergency admissions drop as EV use rises. Delaying EV adoption condemns more Delawareans to developing life long debilitating disease and more frequent acute attacks for those already suffering. (California's early transition to electric vehicles: Observed health and air quality co-benefits" Science of The Total Environment Volume 867, 1 April 2023, 161761).

The predicted health impacts are confirmed. For the health and well being of all Delawareans we need to move forward with the greatest possible speed to adopt electric vehicles!

DNREC Staff,

I want to urge you to not listen to the opposition groups that are pouring thousands of dollars into Delaware to try and stop your progress on this vital front!

The clean cars program you are working on addresses the climate crisis by reducing greenhouse gas emissions. 70% of transportation greenhouse gas emissions come from passenger cars and trucks.

This shift also addresses the serious health impacts from smog and other tailpipe pollution like asthma, cardiovascular disease, impaired lung development in children, and preterm and low-birthweight infants, for all Delawareans but particularly disadvantaged communities. The ACCII also includes improvements in the air quality standards that protect our health.

Delaware drivers deserve to have access to these clean, money-saving, health protecting vehicles that are almost completely unavailable from Delaware dealers until we join this program.

Don't let the opposition's misrepresentations get in the way of this important opportunity.

The many benefits are compelling and I urge you to stay the course and pass this regulation.

Thank you for your consideration.

Sincerely,

Frank Burns
