Subject: Electric vehicle mandate

I am writing on behalf of my husband and I to voice our strong opposition to the electric vehicle mandate proposal. Having worked for 5 different Cabinet Secretaries at DNREC I learned a great deal about the ozone transport issues Delaware deals with. This proposal will not even remotely change the ozone issues here. The infrastructure required is not available to support this mandate. If you ban the sale of gasoline and diesel engine fired vehicles, we will buy them in a different state. People are suffering to keep afloat and do not need anymore government mandate. We do not need any more regulations to make the cost of everything people need to meet their basic needs such and food be driven up any higher. The people you are supposed to be serving will suffer unduly with these kinds of regulations. This is Delaware, not California.

Please listen to the majority of the people and do not proceed with this proposal.

Respectfully,
Carol C. Brown
