**Subject:** WAKE UP!

You will NOT tell me what kind of car I can buy or drive. Delaware will not stand for this snowflake crap being forced on them by state or federal government. You might THINK you have a lock on the elections through fraud and corruption (yes, we've known it for decades) but you may find out just how wrong you are if you continue on this path.

You need to pay attention:

"A survey conducted by Ragnar Research in February 2023 found that 73% of Delaware voters opposed the gasoline and diesel-powered vehicle ban, with only 18% supporting the ban. Follow-up questions showed 60% strongly opposed while 9% strongly supported the ban.

Delaware legislators need to pay attention

The survey found that 63% of the people who voted in the last two elections are less likely to vote for a candidate who supports such a ban, with only 12% more likely to vote for such a candidate."
