To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Kyle Krall,

IPCC report Monday says we are in dire straits because of greenhouse gas emissions. In Delaware, transportation is the biggest contributor to emissions.

We need to phase out gas cars as soon as possible. ACC II is a good program for an orderly transition to electric transportation. It's good for our health (cleaner air), our pocketbooks (cheaper to operate), our future (reduces greenhouse gas emissions).

Currently, DE dealerships rarely have EVs to test drive or buy. We end up giving up, buying online, or going out of state. We are being discouraged from buying them. We need to change that now.

DNREC Staff,

I want to urge you to not listen to the opposition groups that are pouring thousands of dollars into Delaware to try and stop your progress on this vital front!

The clean cars program you are working on addresses the climate crisis by reducing greenhouse gas emissions. 70% of transportation greenhouse gas emissions come from passenger cars and trucks.

This shift also addresses the serious health impacts from smog and other tailpipe pollution like asthma, cardiovascular disease, impaired lung development in children, and preterm and low-birthweight infants, for all Delawareans but particularly disadvantaged communities. The ACCII also includes improvements in the air quality standards that protect our health.

Delaware drivers deserve to have access to these clean, money-saving, health protecting vehicles that are almost completely unavailable from Delaware dealers until we join this program.

Don't let the opposition's misrepresentations get in the way of this important opportunity.

The many benefits are compelling and I urge you to stay the course and pass this regulation.

Thank you for your consideration.

Sincerely,

John Irwin
