To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Kyle Krall,

I am concerned that our state, country and world are addicted to oil, as President Bush (W) said. This means that dictators like Putin and Saudi Arabia are making gobs of money from high oil prices if we use ZEVs, that will mean less gasoline will be used. Lower demand for gas/oil will lower prices. Earning less money for oil dictators.

And it will clean up our air and curb climate change.

DNREC Staff,

I want to urge you to not listen to the opposition groups that are pouring thousands of dollars into Delaware to try and stop your progress on this vital front!

The clean cars program you are working on addresses the climate crisis by reducing greenhouse gas emissions. 70% of transportation greenhouse gas emissions come from passenger cars and trucks.

This shift also addresses the serious health impacts from smog and other tailpipe pollution like asthma, cardiovascular disease, impaired lung development in children, and preterm and low-birthweight infants, for all Delawareans but particularly disadvantaged communities. The ACCII also includes improvements in the air quality standards that protect our health.

Delaware drivers deserve to have access to these clean, money-saving, health protecting vehicles that are almost completely unavailable from Delaware dealers until we join this program.

Don't let the opposition's misrepresentations get in the way of this important opportunity.

The many benefits are compelling and I urge you to stay the course and pass this regulation.

Thank you for your consideration.

Sincerely,

Charles Garlow
