>

> I'm writing to you because I am opposed to the mandate regarding electric vehicles.

> I can not afford the price of a new electric vehicle. I don't believe our electrical grid can handle all the ev's you want all of Delawareans to purchase. This should be a personal choice that we should make if we want to buy one. It should not be the government dictating to us what we can drive.

> I also believe that it will be a financial disaster for Delaware. The state will not have the tourism it now has. If people can't buy gas for their cars they will not want to visit Delaware.

> It will drive out all the small businesses because they will not be able to afford to buy an electric car.

> I would not be able to drive to Florida without stopping numerous times to charge the batteries.

> Also what happens to all those batteries when they need to be replaced. How are you going to handle that.

>

> This should be an action that should be voted on by all Delawareans. Not the dictate of one person.

> Stop the government from ruining our lives. The government has too much power over the citizens. You are not a dictator, but you are becoming one in every area of our lives.

>

> Please withdraw your mandate for ev's.

>

> Thank you,

>
