Governor Carney,

The definition of Socialism is the state dictating what manufactures produce and what consumers are allowed to buy. This is what the DNREC Clean CAR II standards are mandating. *What is the plan to insure electrical grid capacity and security? With 80% of current critical car battery materials supply chain under the control of China, won't our battery purchases (indirectly) fund the construction of new Chinese coal and oil fired electric generation?* I am not against Electric Vehicles, I am against bad legislation implemented by mandate.

How is it possible that such sweeping changes that IMPACT EVERY DELAWARE CITIZEN'S DAILY LIVES can be implemented without being voted on by our elected state representatives? YOU are talking away my right of representation. You are taking away the right of representation for every Delaware citizen.

It is not OK that unelected state agency/DNREC leaders can make this decision and force it on Delaware residents. **This needs to be debated and voted on by the Delaware legislature. You need to show leadership and make the Legislature vote on this. Your Political Party has a clear majority, what ARE YOU AFRAID OF?**

DNREC is not implementing regulation, they are implementing socialism. Looks like we need to pursue good old fashion litigation to start teaching the politicians how to read the Delaware Constitution.
