Subject: EV Mandate

As citizens of Delaware for the past 24 years, we are writing to you about our concerns for the proposed EV Mandate for Delaware.

According to the Delaware Prosperity Partnership website, "Ranked No. 1 in the nation for agricultural value sold per acre, the state of Delaware is a food production powerhouse on the cutting-edge of some of the most modern advances in food and agriculture."

"Delaware is one of the country's leading producers of broiler chickens, generating more than \$1 billion in sales annually...Farmers form the backbone of Delaware's economy. Corn is the top crop..."

The facts speak for themselves.

The proposed, forced mandate will effectively shut down agriculture in the state of Delaware thus bankrupting our state.

Who could possibly back such a policy???

We urge you to seek the facts of the impacts of such a far-reaching policy and SHUT THIS REGULATORY PROCESS DOWN.

Thank you.
