I am writing to express my complete and total OPPOSITION to your proposed ZERO EMISSIONS STANDARD. (Electric cars by 2035). These vehicles are MUCH more expensive than standard gas powered cars and trucks, are MUCH more expensive to maintain and require the addition of expensive charging stations.

How the hell are poorer families without the resources to afford even a minimal new car going to find the money for all this junk, and where are they going to find the time and location to place a charging station when they live in multi-family apartments in congested city areas? The cost of minimal acceptable used gas cars will also go up due to supply and demand so that is not a solution either.

This is a STUPID SOLUTION to a problem that doesn't exist. Get a brain and STOP THIS NONSENSE.
