I am writing this to encourage you to kill the effort to require mandatory EV conversion in Delaware.

It goes so strongly against freedom of choice.

1. The infrastructure is not ready.
2. The air quality in Delaware is not an issue. Not broke, don't fix it.
3. Free markets do a better job in managing Consumer Choice, than Government.
4. Is huge over-reach denying Life, Liberty, and Pursuit of Happiness. Gov't needs to back out of consumer issues.
5. It will actually do more harm to environment in terms of pulling more energy from Electric plants, which pollute more and excavating for lithium around the globe.

Dont' get it at all.

Thanks much,

Charlie Walter
