To: Krall, Kyle (DNREC) < Kyle.Krall@delaware.gov>

Delaware is not in the position to adopt this yet. Our electrical grid or our personal finances are not ready to endure this large expense. Leave it up to peoples choice whether they would like to buy electric vehicles or not! Who is going to fund the expenses for people to retrofit their homes to charge electric vehicles? I am not against this, but not so soon. Shoot for a goal of maybe 2035 or beyond.

Thank you Larry DuHadaway
