To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Mr. Krall,

I am writing to express my full support for adopting California's ACCII clean air standards. Sadly, a lot of misinformation has been going around regarding this issue. The facts are that ACCII establishes manufacturing requirements on AUTO MAKERS - not drivers or dealerships. This regulation does NOT affect used vehicle sales.

Our pollution in Delaware is AWFUL!!! More than 81% of Delaware residents live in counties that do NOT meet federal EPA clean air standards for ozone. And, it is a proven fact that grid interruptions have NOTHING to do with EVs. Moreover, as of May, 2022, 18 states have adopted California's ACCI program.

DELAWARE needs to get on board and do what is needed to protect the health and safety of its residents by taking action to reduce the effects of climate change immediately.

Thank you,
Valerie Faden
