To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Stop the Californication of Delaware. Delaware doesn't need another hoax or fake problem to throw money against so Democrats can line their and their donors pockets. And this crazy scheme is designed to eliminate fossil fuels which will impact every Delaware middle class blue color worker who can't afford to buy a \$70000 EV. Additionally, there is not enough infrastructure to support a massive number EVs on Delaware highways. And what about our farmers who need diesel to operate their equipment? Again keep West coast lunacy on the other coast.

Regards

Paul Fowler
