To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Mr. Krall,

I write to you tonight in STRONG SUPPORT of the adoption by reference of California's Advance Clean Car II regulations. Delawareans strongly support the adoption of this as indicated by their continued overwhelming support of politicians and decision-makers that would like to implement these policies. The future of our livelihoods in Delaware are dependent on every state's ability to counter the effects of climate change by promoting the policy outlined in ACC II. State agencies should not be fearful of, nor back down to the climate misinformation and denialism propagated by the far-right agenda. I appreciate you taking the time and commend you for taking this to the public for feedback. I am looking forward to seeing ACC II come to fruition in Delaware.

Sincerely,
Austin Gray
