OPPOSED to your plan to ban gas powered vehicles

To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Mr. Krall,

I am a resident of Delaware and as such I am 100% opposed to legislation that will eliminate traditionally powered vehicles. I am not wealthy, and I cannot afford to purchase, or maintain and replace a battery of an electric vehicle. I can barely afford a traditionally powered vehicle with the high cost of gas and repairs. I am also concerned about the safety of EV's as their frames are lighter and batteries massively heavier which will lead to increased deaths from EV crashes. Show me the extensive studies and data that EV's are safe first, before passing this legislation. Also, EV's have in no way been shown to be environmentally superior to traditionally powered vehicle and until that is definitely demonstrated I do not approve of my tax dollars going to wasteful EV charging stations, diverting electric power from an already strained infrastructure and eliminating my option and right as a free American to purchase a vehicle that I see fit to utilize for myself, my family and my occupation. We do not live in Communist China! And I do not live in California! I do not approve of our legislature and governor following the edicts of any other State that has not been voted on and approved by the Delaware population.

If you continue to work toward this end of banning traditionally powered vehicles, then I will make it my top priority to speak out against that and your office and I will ensure that you and your party will be voted out of office.

Sincerely,
Lori Miller
