To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

When purchasing gas there is a gas tax included in the purchase price. What are the state's intentions to make up for the loss of revenue? Even charging a person at a charging station will not make up for the loss it would receive from the gasoline tax.

I disagree with the entire ban on gasoline vehicles. I do not support Delaware adopting California's Advanced Clean Car Ii standards and should adopt their own standards which should be voted on by the public.
