To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

There is no thought about the consequences of this mandate.
There is no infrastructure in place nor will there be in the future to handle the volume of traffic. What will happen to this wonderful vacation area? How can we travel, pull boats. This is nothing but politics.
The lies about global warming and sea level rise.
The changes have been happening over millions of years. I realize the colleges have to keep the lie going in order to receive money from the government (we the people).
