To: Krall, Kyle (DNREC) < Kyle.Krall@delaware.gov>

We are absolutely opposed to Governor Carneys approval of this act. Do these people holding political office ever think about the people that can't afford to buy an electric vehicle as well as maintain them. Our younger generation is already struggling enough with high food cost, utility & gas prices. Not too mention daycare so they can both work too support the family. Long gone are the days when Mommy could stay home!

What will senior citizens do? Where will the people who live in the cities plug the cars into? Who repairs the chargers when they get vandalized, because we all know crimes not getting better. I'm tired of rich people making decisions on how we are supposed to live when they aren't paying for Lynn Borreggine it.
