To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Thanks for the opportunity to comment on the EV mandate being driven by DNREC at Carney's request.

My strong belief is the direction as described in the video session I saw is wrong for Delaware. Such a significant life change should be put to a referendum and not just forced on us by climate change zealots in the government. Issues of infrastructure, buyer cost and demand for the product are being glossed over IMHO.
