To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

I wanted to write and say I am against this proposal. This proposal is not something Delaware should follow. It impacts me as I am getting close to retirement and just as I retire you would be looking for me to purchase an expensive electric car. Let the market drive the solution. If you want have a tax credit for electric vehicles but not what California is planning.

Thank you
