To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

I am totally supportive of the amendments proposed to Title 7 Code 1140, Delaware Low Emission Vehicle Program. I wish the timeframe could be shortened even more, but the gradual approach will certainly give both consumers and the technology plenty of time to adapt.

I am increasingly dismayed by the misinformation being spread by those opposed to these changes. Rep. Richard Collins and Sen. Brian Pettyjohn both have been on the air numerous times with WGMD spreading inaccurate information about vehicle ranges, towing capacities, operation in winter weather conditions, safety of batteries, etc., etc. It is Shameful.

Please continue to move forward towards the goal of Zero Emissions on all our roadways!

Thank You,
George W. Thompson
