To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

I want my voice to be heard ! Why would you mandate a technology that is not proven or even have the infrastructure to support it? I wonder how and why our so called leaders or officials in the USA can just do what the like and shove their ideas and mandates down our throats your hurting the people of this state, if your very well off they can afford to do these things and take the loss myself and most people are not you should rethink what you are doing!
