To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Accepting this low emmision regulation is not only a very bad idea it is not even taking in the effect on the people of Delaware. Do you really want to happen here what happened in California when they lost power? If you are in office for us the citizens think about this long and hard not just for political party.Consider those who are not wealthy and that includes seniors on fixed income

Thank you for considering this
