Proposed zero emission vehicle regulation

To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

I am writing to express my opposition to what I know as a zero emission vehicle regulation proposed by DNREC. First I believe it is government overreach for DNREC to propose such a regulation. Secondly, I believe that this climate change stuff is just a means for the elite to get richer and move to a green economy, while what they implement will cause droughts and famine etc, and lastly. I am a 73 year old man who can not afford an electric vehicle. I live on a fixed income of about $35,000 per year. I am doing everything I can to live as best I can within my means. I even drive a Prius because I can get 55 plus miles a gallon. I can not afford to switch to an all electric vehicle. Maybe by 2035 I will have passed away and won't have to put up with this nonsense anymore.

Respectfully submitted,
