To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

We The People Never voted for DNREC.

The Delaware Constitution makes no mention of DNREC, EPA, NIH, CDC, FDA, etc...

Who voted for the appointed agency DNREC to decide to do away with the vehicle that I have properly maintained for years? Who voted for the DNREC agency to determine that my combustible gas engine vehicle is a hazard? We the people never did.

The Delaware State Constitution makes no mention of DNREC.

The Green New Deal and all the fake climate change garbage is the biggest and most destructive scam ever perpetrated on the American people besides the covid Vaxx scams.

Just look at what's happening in NY state.

People are freezing to death because the gas companies are being put out of business for causing "global warming."

Look at what just happened to the people who got stranded in their subsidized electric cars during the cold snap. EVs DO NOT CHARGE UNDER COLD CONDITIONS!

What about the fact that all those rare earth metals are being mined in the Congo under the most dangerous conditions by child slave labor? The earth is being destroyed to mine cobalt, copper, etc... in Africa. Talk about slavery.

Meanwhile, all the politicians who are shoving this nonsense down our throats are getting rich.

There is no manmade climate change. None.

No reason to destroy our energy and auto industries.

Stop persecuting We The People!!
