To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Sir;

I am vehemently opposed to the "phase out" of all gasoline powered vehicles in Delaware, or for that matter in the United States in general. Like the illegal Obama administrations selection of Solyndra, it is supporting through our tax dollars the selection of a technology that is not ready for general use. Will electric vehicles have a use in our country, maybe in the future, but for the Government to Mandate electric vehicles is Unconstitutional whether supported by Unconstitutional Law or not. Thank you for your consideration in this matter.

Sincerely,

David L. Craft, RPh
