To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Mr. Krall:

I am a resident of Delaware, and I am opposed to this legislation that plans to eliminate traditionally powered vehicles. I don't believe the technology is sufficient to impose restrictions to Delaware residents to only purchase electric vehicles.

I am concerned about the safety of electric vehicles as their frames are lighter and batteries massively heavier which will lead to increased deaths from EV crashes. I do not support school buses being converted to electric vehicles for this same reason. Show me the extensive studies that show that electric vehicles are safe. Also, electric vehicles have in not been shown to be environmentally superior to traditionally powered vehicles, and until that is definitely demonstrated, I do not approve of my tax dollars going to wasteful electric vehicle charging stations, diverting electric power from an already strained infrastructure and eliminating my option and right as a free American to purchase a vehicle that I see fit to utilize for my family and me. We do not live in California!

I do not approve of our legislature and governor following the edicts of any other State that has not been voted on and approved by the Delaware population.

Sincerely,

Pam Procaccini
