To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Good Day,

I am writing to voice my opposition to an un elected dept. imposing regulations that directly effect every persons right to life liberty and the pursuit of happiness. Forcing us to switch to a still un proven mode of transportation is out and out wrong. Should we pursue this, sure, but FORCE it NO. We have no infrastructure for this. Not only charging stations but main electrical grid. Why are you not talking about what it takes to build all those climate friendly vehicles? What type of vehicles does it take to get the raw materials? What do you do with the "batteries" from the EV's when they are done? Oh you're not forcing us out of our cars and trucks, really? Hydrogen and Diesel, yes Diesel, are better alternatives. Hybrids make more sense. Well the Government doesn't represent we the people, only themselves. This proposed "Regulation" is a slap in the face of Delawarean's.

Respectfully,

Steven A. Fuchs
