Dear Kyle,

I am writing to voice my EXTREME opposition to you and our Governor who are trying to emulate Gruesome Newsome! We are NOT California! We aren't anywhere near as big nor as heavily populated. We don't want to be like California!

We have a large farming population here in DE as does CA. Farmers can't take care of their land or produce the food we eat using battery powered tractors and vehicles.

We in Delaware do NOT want to eliminate the use of fossil fuels because gas and diesel powered vehicles are the most efficient types of vehicles available.

As with canceling the pipeline and putting all the oil field workers out of work, what will all the small engine workers do for work if you do away with their livelihood?

Where is all the electricity going to come from? Where is electricity that we use now generated? Every time a car hits a telephone pole in my neighborhood, we are without power until the electric company can repair the pole and wires. If everyone runs an electric vehicle, where will the electricity come from? Has anyone stopped to think about that? I know Newsome hasn't. Don't be like Newsome! NO electric FORCED vehicles in DE!

Respectfully,

VickiTyler Fuchs
