To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Why don't you ban private planes instead of our cars. These planes leave bigger carbon footprints. You just want to harm middle class and low income families. We cannot afford electric cars and batteries. Our grid cannot handle such a massive increase in electric consumption. We also do not have good bus or train service like the Europeans do that we can use instead of driving, This is not being progressive but brings us backwards and makes us much poorer.

God bless you,
Joanne Minchini8
