**Subject:** hate electric car initiative

not including the fact I like cars... mandating fully electric cars is ridiculous! The cars, batteries, materials to make the components feasibility is crazy. But, as typical with most all democrat ideas are illogical, not planned out and no real research done. Just plain stupid! If this was a republican idea or stipulation...it would be called racist as minimum actual cost for a new EV would be minimum \$40k+.

I object to Carney's socialist/communist planned law/mandate/ requirement in DE... initiating soon in Delaware. \_\_\_Chuck from Sussex County.
