Ev cars

To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

I'm sorry, but this country cannot afford to go to electric cars. We don't even have an electric grid that can provide electricity to what we have now. They asked you to turn your electric down and up because they can't keep up. Another thing it takes a lot of fossil fuel just to get the electricity to run the car and the cars are too expensive for anyone to get. So I think you should put your money into the grids and stop this nonsense about electric cars.

Thank you
