To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

I would like to know how to oppose the governors mandate relating to EV's. One important point would be when a storm hits and people have to evacuate - power interrupted to homes - what happens when these electric vehicles stall out in a traffic jam during evacuation?

I'd love to help get this in front of reasonable people

I also believe that the automotive industry will eventually turn toward hydrogen power fuel cells and not batteries The carbon footprint is much more favorable than EV's overall.

Happy new year ,
