To: Krall, Kyle (DNREC) < Kyle.Krall@delaware.gov>

Please stop the ban on gasoline powered vehicles.

Our state and country adhere to some of the most strict laws and rules for the ecology. More so than most if not all in the world.

Yes, we care, we also need to keep a balance of life versus ecology.

So many of us are already finding it very difficult to manage, even before inflation kicked in.

May in Delaware find it financially draining if not impossible to purchase a vehicle, new or used, let alone an electric vehicle. The cost for them us considerably more.

We hear from our politicians how much they care about everyone; however, their actions continue to show otherwise.

They can afford what many of us cannot!

Please vote against a ban of any kind on gas powered vehicles and preserve Delaware's citizens ability to provide for their families!
