Hello,

I attended the zoom workshop held last night 11/17/2022. Glad I did too. Learned a lot about a law the Governor is pushing that very few people have even heard about. That's kinda sad since it will affect many in one way or another.

A few questions I have are:

Are the car dealerships in Delaware allowed to sell gas powered cars/trucks or are they only allowed to sell EV cars after 2035?

Also is this going to extend to personal gas lawn mowers, leaf blowers, etc.?

Which department is looking at how the EV batteries are made and costs for replacement when EV car needs new one?

Thanks for your response.

Cathy
