To: Krall, Kyle (DNREC) < Kyle.Krall@delaware.gov>

I'm not convinced electric vehicles are the way to go. Have heard too many negative comments about the batteries — cost, safety, environmental impact — to say nothing of initial cost of the cars to start with.

What will we do when an ice storm takes out the electric grid for a week? That has happened at our home within the 30 years we've lived here.

Improving public transportation would seem to me a good first step!
