RE: Approval of Infiltrator CM-1060 multi-compartment septic tank

Dear Mr. Lentz,

The Division of Water Resources has received and reviewed your request to approve Infiltrator System's new Model CM-1060, thermoplastic septic tank. We are pleased to inform you that we are able to approve the septic tank referenced above, provided that they are installed in accordance with the manufacturer's installation instructions and specific permit conditions.

Additionally, as a condition of this approval, Infiltrator Systems, Inc. will be required to supply the Department with a list of authorized assemblers and assembly locations for the CM-1060 tank, as well as written Quality Assurance/Quality Control protocol and inspection procedures (IAPMO/CSA) for the authorized assemblers and certified assembly locations. At no time will the Model CM-1060 be permitted to be assembled on construction sites or by anyone other than an authorized assembler.

If you have any other questions please contact me at 259-7002.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Cassidy", written over a horizontal line.

James Cassidy
