Disclaimer: The Map layers are hosted in publicly available datasets via Delaware FirstMap. Map details are used to enhance public access to information. We try to keep the data timely and accurate, but we make no expressed guarantees to the recency of the information. Errors will be resolved as they are brought to our attention.

- Using the Map: Map Functions -

GIS Tool Name	Map Icon	What does it do?
Refresh Map		Refresh the map view
Search		Search Map Layers. Click the dropdown for info about different layers
Clear		Clear your current search result on the map
Zoom In	 or 	Zoom in on the map. You can use either the buttons, scroll-up using a computer mouse, or pinch in on a tablet touchscreen.
Zoom Out	 or 	Zoom out on the map. You can use either the buttons, scroll-down using a computer mouse, or stretch out on a tablet touchscreen.
Pan		Pan the viewed portion of the map.
Full Extent		Returns the map to the view first shown when logged into your account.
Previous Extent		Clicking this returns the map to last extent you had previously viewed.
Next Extent		Clicking progresses the map to an extent you

		had explored after your current view. Only works if you've used Previous Extent already.
Identify		Click on a part of the map to identify features. Use it to find facility ID number, school area, and other info when the layers are selected.
Select Features		Select specific features on a map with a variety of tools. Point, line, polygon and freehand drawing tools are available.
Measure		Measure distances with a variety of units
Print		Print the current view of your map
Base Map		Displays the underlying map image; click the dropdown to pick a different map; Only the current view works right now
Scale Bar	 or 	A visual indicator of distance on the map in a straight line. Distance varies depending on your current map scale.
Compass		Indicates the direction of the map. North by default
Long	Long.: -75.47773	Longitude on the map
Lat	Lat.: 40.00928	Latitude on the map
Map Scale	Scale 1 : 2083374	Shows what scale the map is currently rendered at. Changes when Zooming In/Out on the map or typing a number into the box. When logging in the map will display all of Delaware. Certain map layers are only visible on the map if you make the map scale small enough (i.e. 1:500000 or 1:9600)
