

EECBG Eligible Projects List

Renewable Energy Projects	Energy Efficiency Projects	Others
Ground Solar	Replacement of aging, inefficient HVAC equipment with more efficient systems	Biofuel Production
Rooftop Solar	Replacement of Halogen Lighting with LED Lighting	Wastewater Treatment
Façade Solar	Lighting Control and HVAC Control Panel Installations	Tree Planting
Solar Carports	High global warming potential refrigerant replacement with one that has a lower global warming potential	Recycling Programs
Solar Street Lighting	Combined Heat and Power Installations	Material Conservation Programs
Battery Storage	Air Source Heat Pump Installations	Methane Capture
EV Charging Stations	Installation of higher efficiency food service appliances	Preserving Natural Resources
Geothermal Energy Measures	Strategic Energy Management	Public Energy Education and Outreach Programs
Wind Energy Measures	Energy Audits	Transportation Reduction Solutions
Microgrid Projects	Building Code Updates	Micromobility Solutions
Floatovoltaics		

May include other projects at the discretion of the relevant Secretary of the EPA, Transportation, or Housing and Urban Development in consultation with the Division of Climate, Coastal, and Energy. Contact us to find out if your project could qualify (302)735-3480.
