## Reduced Emissions

The Skipjack Wind Farm will deliver 120 MW of clean energy to Delmarva Power's transmission system, which will reduce emissions from local fossil power plants.

## Lower Wholesale Prices

Doing so will also reduce electric congestion and result in lower wholesale power prices for the entire Delmarva service area.

## Future Clean Energy

As demand for clean energy grows, the Skipjack Wind Farm can be cost-effectively expanded to meet the needs of regional coastal communities.
