

Green Energy Program Incentives

Effective July 10, 2023

Geothermal Heat Pump Grants (\$/Ton)	Residential	Non-Residential	Non-Profit
First 2 Tons	\$800	\$800	\$1,000
Over 2 Tons	\$700	\$700	\$800
Maximum Grant	\$5,000	\$30,000	\$30,000

Solar Water heating Grants (\$/kWh Saved)	Residential	Non-Residential	Non-Profit
SWH Water Heater Only	\$1.00	\$1.00	\$2.00
SWH With Integrated Heating	\$1.00	\$1.00	\$2.00
Maximum Grant	\$5,000	\$10,000	\$10,000

Wind Turbine Grants (\$/Watt)	Residential	Non-Residential	Non-Profit
0 - 5,000 Watts	\$0.85	\$0.85	\$1.75
5,001 - 50,000 Watts	\$0.25	\$0.25	\$1.00
Maximum Grant	\$15,000	\$24,000	\$50,000

Photovoltaic grants (\$/Watt)	Residential	Residential PPA/Lease	Non-Residential	Certified Diverse Business	Non-Profit
Up To 50,000 Watts	\$0.70	No	\$0.70	\$0.80	\$0.75
Maximum Grant	\$6,000	Incentive	\$30,000	\$40,000	\$35,000

Notes:

- These incentives apply to Delmarva Power and Light (DPL) customers only.
- Geothermal systems must meet minimum EER rating of >18 and COP >3.6 at partial load.
- Solar water heating system grants are calculated based on the \$/kWh saved OG-300 rating issued by the Solar Rating
- Certification Corporation (SRCC). Systems with an SRCC OG-300 certification must have the energy savings calculation completed and stamped by a Delaware licensed professional engineer.
- Photovoltaic and wind turbine grants are no longer limited to systems 50 kW and under. Grant applications are evaluated by site address, not electric meter.
- Incentives for non-residential projects with an installed capacity below 6,000 watts will be prorated at \$0.50 per watt.
- No grant for any renewable energy installation may exceed 50% of the total project cost.
- As allowed per program regulations, the GEP is including a cost cap. In order to be eligible, the total project cost must be \$6.00/watt or less. This cost cap may be adjusted in the future if dictated by market trends.
- System size must be 100 kW or less to be eligible.
- A Solar Shade Analysis will be required in Part 1 for all applications. The SSA must include the TSRF percent and per program regulations, the TSRF percent must be 70% or greater.
- Applications submitted more than 12 months after installation completion will be considered ineligible.
