

Green Energy Program Incentives

Effective January 1, 2021

Geothermal heat pump grants	Residential (\$/ton)	Non-residential (\$/ton)	Non-profit (\$/ton)
First 2 tons	\$800	\$800	\$1,000
Over 2 tons	\$700	\$700	\$800
Maximum grant	\$5,000	\$30,000	\$30,000

Solar Water Heating (SWH) grants	Residential <i>\$/kWh saved</i>	Non-residential <i>\$/kWh saved</i>	Non-profit <i>\$/kWh saved</i>
SWH water heater only	\$1.00	\$1.00	\$2.00
SWH with integrated heating	\$1.00	\$1.00	\$2.00
Maximum grant	\$5,000	\$10,000	\$10,000

Wind turbine grants	Residential <i>\$/watt</i>	Non-residential <i>\$/watt</i>	Non-profit <i>\$/watt</i>
0 to 5,000 watts	\$0.85	\$0.85	\$1.75
5,001 to 50,000 watts	\$0.25	\$0.25	\$1.00
Maximum grant	\$15,000	\$24,000	\$50,000

Photovoltaic grants	Residential <i>\$/watt</i>	Residential PPA/lease	Non-residential <i>\$/watt</i>	Certified Diverse Business	Non-profit <i>\$/watt</i>
0 to 5,000 watts	\$0.70	No incentive	\$0.70	\$0.75	\$1.40
5,001 to 50,000 watts	\$0.70	No incentive	\$0.70	\$0.75	\$1.40
Maximum grant	\$6,000	No incentive	\$30,000	\$35,000	\$50,000

Notes:

- These incentives apply to Delmarva Power and Light (DPL) customers only.
- Geothermal systems must meet minimum EER rating of >18 and COP >3.6 at partial load.
- Solar water heating system grants are calculated based on the \$/kWh saved OG-300 rating issued by the Solar Rating Certification Corporation (SRCC). Systems with an SRCC OG-300 certification must have the energy savings calculation completed and stamped by a Delaware licensed professional engineer.
- Photovoltaic and wind turbine grants are **no longer** limited to systems 50 kW and under. Grant applications are evaluated by site address, not electric meter.
- Incentives for non-residential projects with an installed capacity below 6,000 watts will be prorated at \$0.50 per watt.
- No grant for any renewable energy installation may exceed 50% of the total project cost.
