

Killens Pond State Park Trail Characteristics

Trail Characteristics	2018 Trail Network (miles)	Proposed Trail Network (miles)	Net Change (miles)
	7.4	15.5	+8.1
Surface			
Natural	4.0	7.7	+3.7
Hardened	3.4	7.8	+4.4
Width			
Single Track	0.9	6.5	+5.6
Double Track	6.5	9.0	+2.5
Permitted Use			
Pedestrian Only	3.4	2.4	-1.0
Pedestrian Bike	3.0	13.1	+10.1
Accessibility			
Accessible	3.2	8.1	+4.9
Not Accessible	4.2	7.4	-3.2

Notes for Killens Pond State Park

8.1 additional trail miles for the park is attributed to expanding single track pedestrian and biking experiences to the east and west of the main part of the park.

4.4 miles of hardened trail would be added to the trail system. Currently 3.4 of the 7.4 trail miles are hardened (stone or paved). Under the proposed trail plan, hardened surfacing would increase to improve sustainability and provide a wider range of accessible trail opportunities in the park.

Current Accessible Trails within the park:

- Bike Trail (2.3 miles)
- Connector Trail (water park to boat rental 0.6 miles)

Future Accessible Trails:

- Pondsides Trail (upgrade existing 0.5 miles)
- Campground Loop (1.6 miles)
- Other (2.8 miles)
