

# Site Evaluation Approval Page

---

The soils on this site are approved when the following is completed in full and signed by the approving authority. Isolation distance requirements, limited area suitable soils, and/or removal or compaction of the topsoil during wet weather may negate construction permit approval or modify the type of system that can be permitted. An approved report must accompany any permit application. *This is not a construction permit.*

## ***INSTRUCTIONS TO PROPERTY OWNER***

1. Contact a Licensed Class \_\_\_\_\_.
  2. A permeability rate of \_\_\_\_ minutes per inch has been assigned to the soils on your site. You may use the percolation rate assigned or, at your own expense, have a percolation test conducted. If you do not choose to use the assigned percolation rate, contact a Licensed Class A percolation tester to have 3 tests conducted at depths of \_\_\_\_ inches in the immediate area of the proposed system.
  3. If you have any questions, call (302) 739-9947 (Kent and New Castle) or (302) 856-4561 (Sussex).
